Recycling Toilet Roca W+W

The WC uses so-called "gray water".
The drain can be switched in the washbasin:

OFF: When brushing your teeth and shaving, the recycling must be switched off, i.e. the drain must be open.

ON: When washing hands etc., the water should flush into the tank for the toilet, i.e. switch on recycling (ON).

Attention: The toilet flush sometimes gets stuck.
If the water runs on for longer, please press again briefly until the valve closes with a clear 'plop'.

Recycling OFF
